🌐 Portfolio 🏠 Fès, Morocco

Profile

Full-Stack Developer with a strong backend focus, interested in designing robust applications, modern architectures, and integrating intelligent solutions into real-world products.

I have developed complete web projects using React, Spring Boot, Express, and PostgreSQL, with a particular interest in LLM-based systems, RAG, and agent-based automation.

Currently seeking a software development / artificial intelligence internship.

EDUCATION

National School of Applied Sciences of Fès

Engineering Cycle in Computer Science

Fès, Morocco

2024 – Present

National School of Applied Sciences of Fès

Integrated Preparatory Classes

Fès, Morocco

2022 – 2024

Mohamed V High School

Baccalaureate in Physical Sciences – Highest Honors

Meknès, Morocco

2022

TECHNICAL SKILLS

Languages: Java • TypeScript • JavaScript • Python

Frontend: React.js • Redux Toolkit • TailwindCSS • Next.js • Framer Motion • shadcn/ui

Backend: Spring Boot • Spring Data JPA • Spring AI • Express.js • FastAPI • REST APIs

Databases: PostgreSQL • MySQL • MongoDB • Sanity • pgvector

AI & Intelligent Systems: LLMs • RAG • MCP • TensorFlow • Keras • Scikit-learn • LangChain4j

Deployment & Cloud: Vercel • Railway • Render • GitHub Actions

Tools: Git • GitHub • Postman • Docker • Git Branching

Concepts: REST Architecture • MVC • Clean Code • API Testing • Automation

PROFESSIONAL EXPERIENCE

SmartCode – Academic Management Platform

GitHub: [Link](#)

React.js, Express.js, MySQL

Project completed as part of an introductory web development internship

- Designed and developed an academic platform structured around three spaces: Student, Teacher, and Administrator.
- Developed REST APIs with Express.js and modeled data using MySQL.
- Implemented and validated API tests with Postman to ensure endpoint reliability.
- Organized the project using a modular architecture to improve maintainability and scalability.

Perlica – Tourism Web Platform

[Live Demo: Link](#)

React.js, FastAPI

Freelance project developed for an American startup

- Contributed to the development of a tourism web platform intended for real production use.
- Developed modern user interfaces and integrated backend features through FastAPI.
- Contributed to a user-oriented solution focused on visual quality and user experience.

PROJECTS

FocusPro – Multi-Vendor E-Commerce Platform

[GitHub: Link](#)

React.js, Redux Toolkit, TailwindCSS, Spring Boot, PostgreSQL

Personal full-stack project focused on business architecture and scalability

- Designed a multi-vendor e-commerce platform with role management for Admin, Seller, and Client.
- Developed a modern, responsive, and structured user interface using TailwindCSS and Redux Toolkit.
- Implemented a robust backend with Spring Boot for managing products, orders, users, and transactions.
- Designed the architecture with a focus on scalability, business clarity, and product evolution.

Telegram AI Chatbot – Management Automation

[GitHub: Link](#)

Spring Boot, Spring AI, MCP, Ollama, PostgreSQL

Personal project focused on intelligent agents and conversational automation

- Developed a conversational agent connected to Telegram to execute business operations through messages.
- Implemented an LLM-based RAG system for document and image analysis.
- Automated CRUD operations through a productivity-oriented conversational interface.
- Explored and integrated the Model Context Protocol, MCP, to extend the agent's capabilities.

ENSAF Clubs – Club Centralization Platform

[Live Demo: Link](#) [GitHub: Link](#)

React.js, Express.js, MySQL, Railway, Vercel

Personal project aimed at improving the visibility of student clubs

- Developed a platform centralizing ENSA Fès clubs and their activities.
- Created an admin dashboard for managing events, members, and content.
- Deployed the frontend, backend, and database using suitable cloud services.
- Worked on navigation, information readability, and the overall user experience.

EXTRACURRICULAR ACTIVITIES

- **Active Member and Debater – TGD ENSAF, The Great Debaters:** strengthened skills in argumentation, communication, and public speaking.
- **Participant – DocVoice:** explored initiatives and interdisciplinary discussions related to the medical field.
- **Participant – IEEE ENSAF Innovation Event:** contributed to discussions around innovative technology project ideas.

CERTIFICATIONS

- **Advanced React** – Scrimba: deepened knowledge of advanced React concepts, hooks, and modern interface structuring.
- **TypeScript** – Scrimba: gained proficiency in static typing and frontend development best practices.
- **Next.js** – Scrimba: developed modern web applications with hybrid rendering and advanced routing.
- **Spring Boot** – Udemy: designed and developed backend APIs using the Spring ecosystem.
- **AI Agents & MCP Server** – Coursera: introduction to designing intelligent agents and tool-oriented AI architectures.

LANGUAGES

- **Arabic:** Native language
- **French:** Intermediate level
- **English:** Intermediate level
